Submitted (13-0CT-1998) Laboratory of Genetics, University of Submitted (13-0CT-1998) Laboratory of Genetics, UNA Submitted (13-0CT-1998) Laboratory of Genome Project at the Wisconsin, 445 Henry Mall, Madison, WI 53706, USA This sequence was determined by the E. coli Genome Project at the University of Wisconsin-Madison (Frederick R. Blattner, director). Supported by NIH grants HG00301 and HG01428 (from the Human Genome Project and NCHGN). The entire sequence was independently determined from E. coli K-12 strain MG1655. Predicted open reading determined from E. coli K-12 strain MG1655. Predicted open reading
                                                                                                                                                                                                                                      frames were determined using GeneMark software, kindly supplied by Mark Borodowsky, Georgia Institute of Technology, Atlanta, GA, 30332 [e-mail: mark@amber_gatech.edu]. Open reading frames that have been correlated with genetic loci are being annotated with CG site Nos., unique ID nos. for the genes in the E. coli Genetic Stock Center (CGSC) database at Yale University, kindly supplied by Mary Berlyn. A public version of the database is accessible (http://cgsc.biology.yale.edu). Annotation of the genome is an ongoing task whose goal is to make the genome sequence more useful by correlating it with other data. Comments to the authors are appreciated. Updated information will be available at the E. coli
                            Genome Project's World Wide Web site (http://www.genetics.wisc.edu). *** The E. coli K-12 sequence and its annotations are periodically updated; this is version M54. No sequence changes. Annotation updates: updated gene identifications and products; all new functional assignments courtesy of Monica Riley; added promoters, protein binding sites, and repeated sequences described in reference 1 The unique numeric identifiers
